

1 Appendix A – Walk-through of Demonstrator Features

The diagrams in this section step the user through the operation and features of the TRL LBS demonstrator.

1. Launch ArcPad

The demonstration runs under ArcPad 5.0.1, which can be started by selecting it from the start menu.

2. ArcPad Initial Screen

Dismiss the dialog boxes that appear after the program launches.

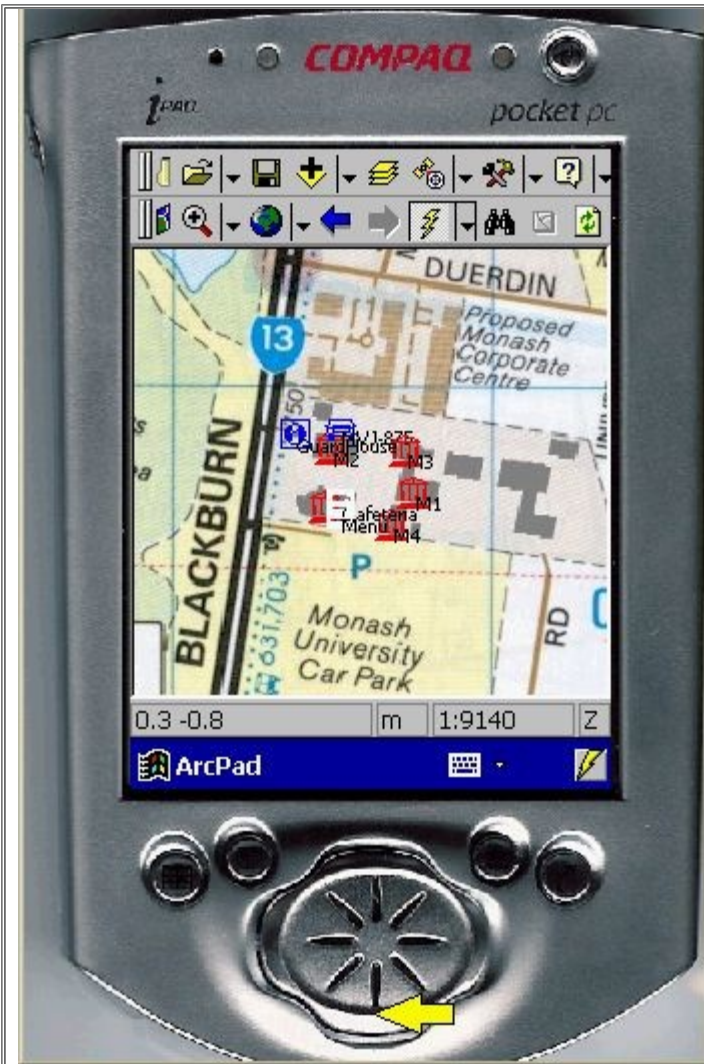

3. Load TRL Project

Select it from the file drop down menu

4. Turn on hyperlink mode

Once the map has loaded, enable hyperlinks by selecting it from the menu as shown. Ensure the button appears depressed as in figure 5.

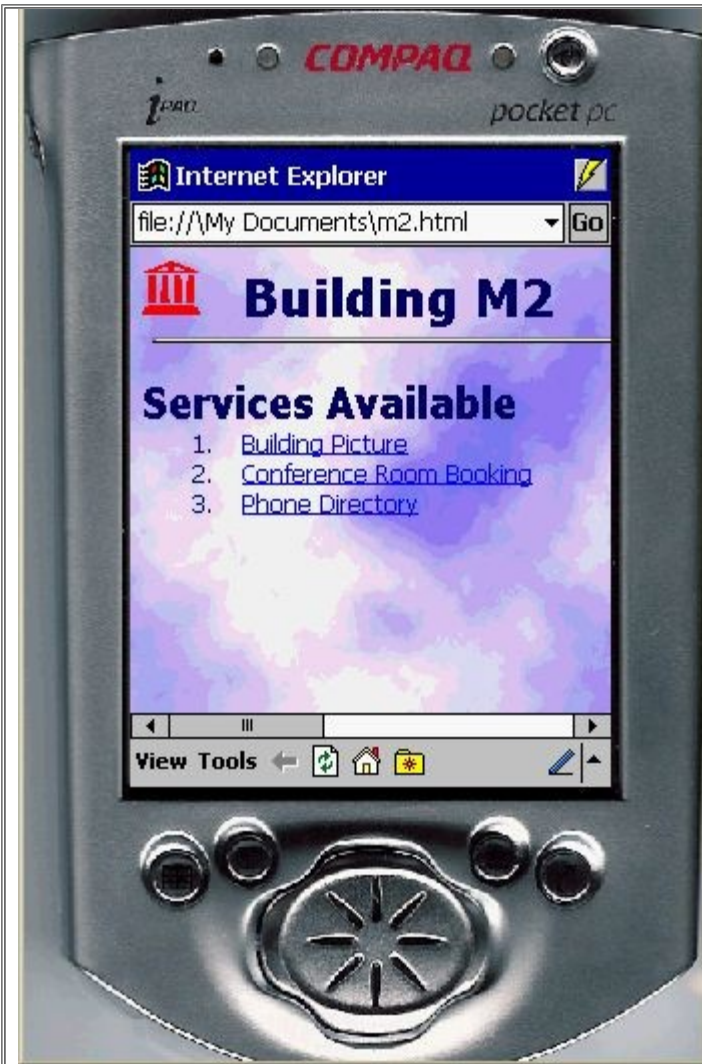

5. Zoom in

The directional button can be used to zoom the map. Pressing the lower edge will zoom in while the upper edge will zoom out.

6. Tap Icons

Tapping any of the available icons will activate the link associated with that item.

7. Building Services Page

As an example, tapping on M2 will bring up the displayed page. Hyper links can be navigated by tapping on them.

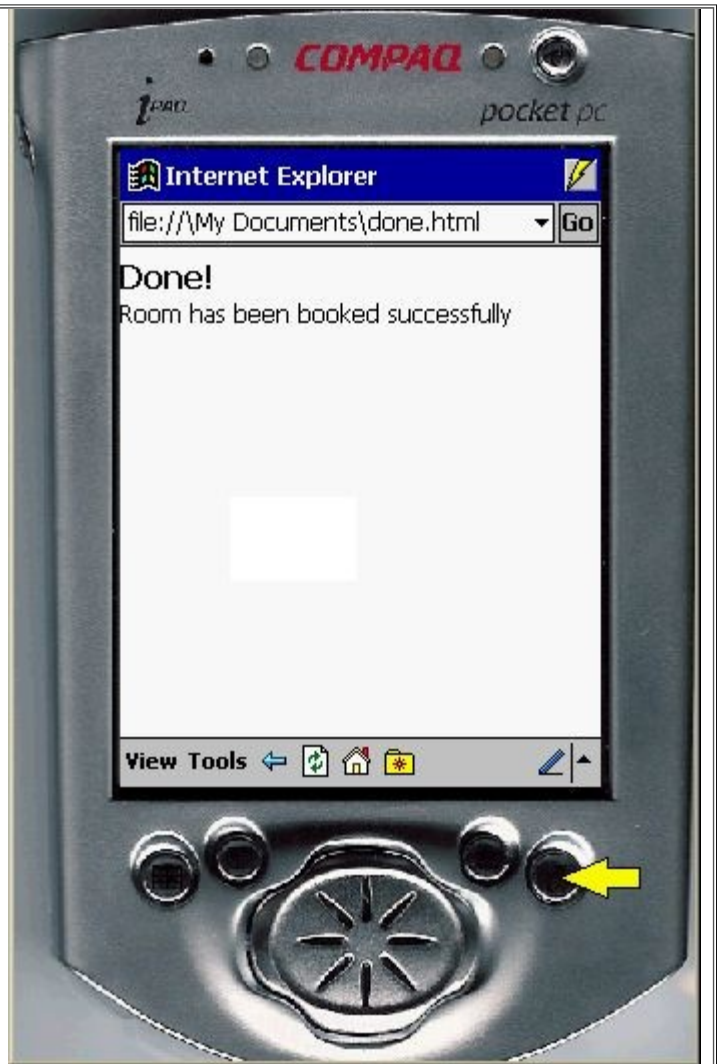

8. Building Picture

Use the browser's back button to return to the previous screen.

9. Conference Room Booking
Fill in the details and tap submit.

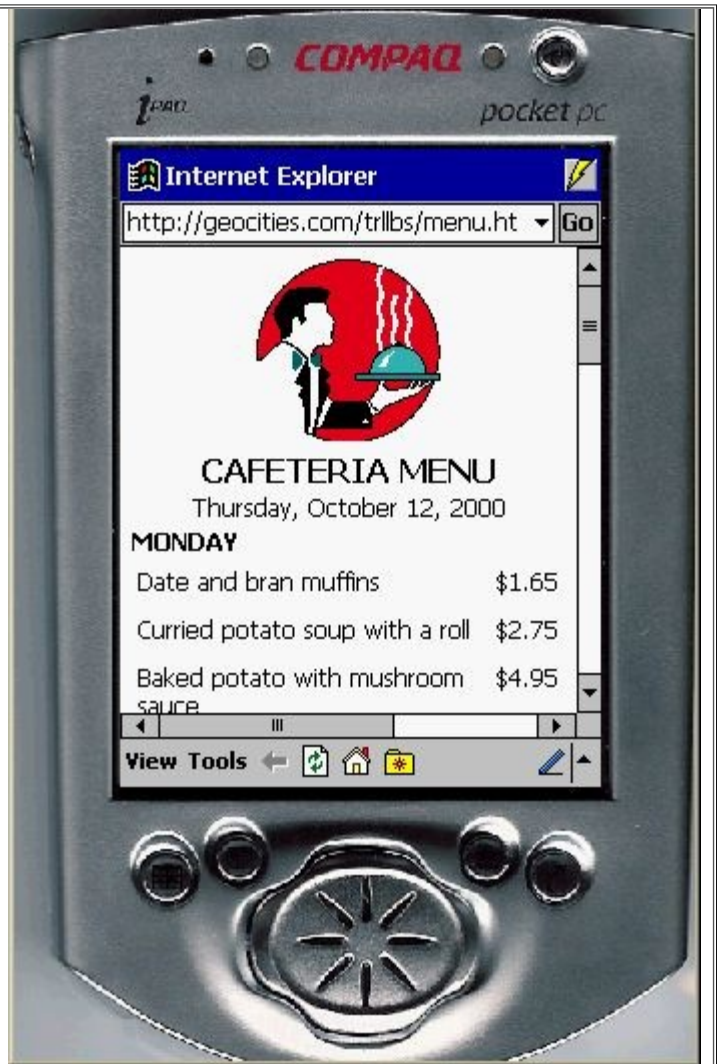

10. Finish and Return
To return to the map press the lower right-most button on the device once, as indicated.

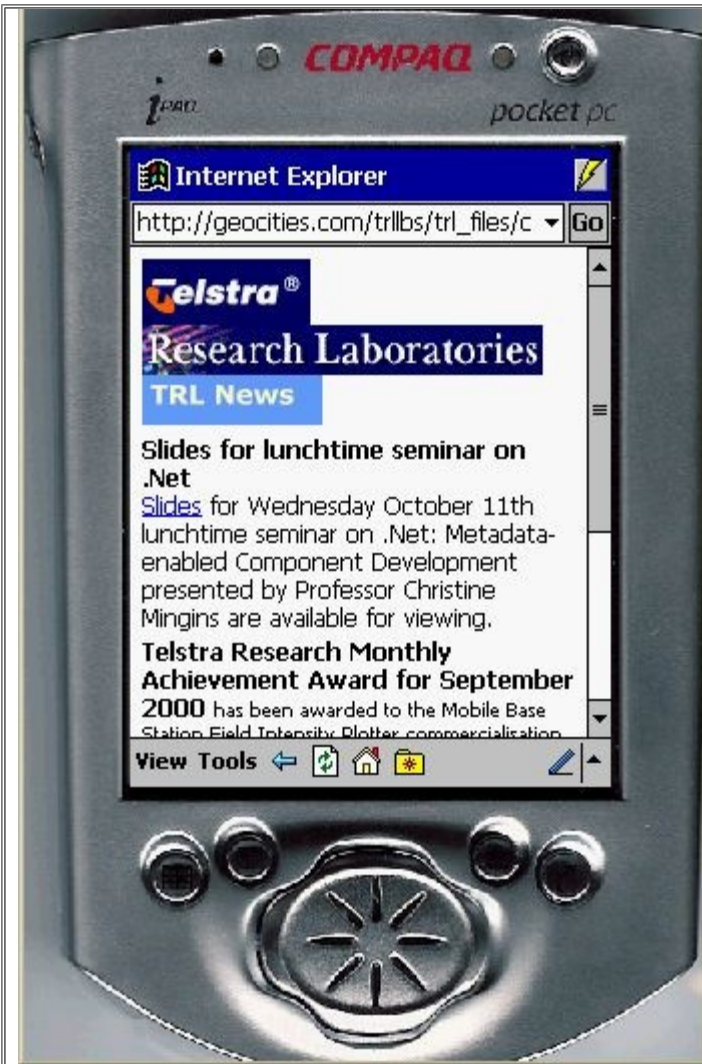

11. Web Enabled Links

If a link on the map is a remote link, ie not stored locally but accessed through the world wide web, then this dialog is displayed. Ensure the phone is aligned with the infrared port and click connect to continue.

12. Cafeteria Menu

The weekly Caf menu is an example of a web link.

13. TRL News
Web example

14. Yahoo!
Any web page may be linked and retrieved.
