

CONTENTS AND INDEX

of Internal Plant Design Engineering Instructions

(ISSUED NOVEMBER, 1955.)

1.1 The reason for the introduction of these instructions are in Section 1. At the time of printing this instruction the Internal Plant Design series of instructions consisted of -

- SECTION 1 - INTRODUCTION.
- SECTION 2 - ACCOMODATION.
- SECTION 3 - RESPONSIBILITIES AND GENERAL PRINCIPLES FOR LOCATING EQUIPMENT.
- SECTION 4 - BUILDING REQUIREMENTS.
- SECTION 5 - SAFE FLOOR LOADS.
- SECTION 6 - WIDTHS AND LENGTHS OF EXCHANGE BUILDINGS.
- SECTION 7 - CEILING HEIGHTS FOR INTERNAL PLANT BUILDINGS.
- SECTION 8 - LOCATING COLUMNS IN NEW BUILDINGS.
- SECTION 9 - EQUIPMENT AREAS INCLUDING COLUMNS.
- SECTION 10 - EXCHANGE EQUIPMENT LAYOUTS.
 - (A) 2000 TYPE EQUIPMENT.
 - (B) PRE 2000 TYPE EQUIPMENT.
 - (C) C.B. AND SLEEVE CONTROL MANULA EQUIPMENT.
- SECTION 11 - AISLES.
- SECTION 12 - PASSAGEWAYS - EXCHANGE EQUIPMENT OTHER THAN MANUAL.
- SECTION 13 - AIR DUCTS IN EXCHANGE BUILDINGS.
- SECTION 14 - CABLE DESIGN METHODS.
- SECTION 15 - PROVISION OF CABLE HOLES IN BUILDINGS.
- SECTION 16 - EXCGANGE IRONWORK.
- SECTION 17 - CABLE TROUGHS - VARIOUS TYPES.
- SECTION 18 - MAIN DISTRIBUTION FRAMES.
- SECTION 19 - CROSS CONNECTION FRAMES.
- SECTION 20 - POWER DISTRIBUTION SYSTEMS.
- SECTION 21 - TESTING EQUIPMENT.
- SECTION 22 - AUTOMATIC ROUTINERS AND TRAFFIC RECORDERS.
- SECTION 23 - SPECIFICATIONS.
- SECTION 24 - LADDERS.

1.2 An index of the contents of these instructions follows.

Space has been left between the alphabetical divisions for officers to index E.Is issued after the preparation of this Index. These E.Is will be dated later than November, 1955.

INTERNAL PLANT
Design

	<u>Section</u>
Access Racks or Equipment.	22
Accommodation Basic Considerations.	2
Accommodation, Length Table, Temporary.	6
Accommodation, Width Table, Temporary.	6
Adjustments, Switch, Reference in Specification.	23
Air Duct Systems, Horizontal.	13
Air Ducts in Battery Rooms.	13
Air Ducts in Equip. Room, Placement of Main.	13
Air Ducts in Exchange Buildings.	13
Air Ducts in M.D.F. Areas.	13
Air Ducts in Passageways.	13
Air Ducts in Power Rooms.	13
Air Ducts, Location of.	13
Aisle Spacing, Uniform.	8
Aisles, where used.	11
Aisles and Passageways, Pre 2000 Type Layouts, Dimensioning of.	10
Aluminium Busbar, Max Load Etc.	20
Aluminium Type Manual Exchange Buildings, Prefabricated.	10
"A" Positions Required for manual exchanges.	10
Appropriation Charts, reason for.	19
Areas Including Columns, Equip.	9
Arrangements, Equipment Grouping.	10
Assessing Floor Areas for 2000 Type Exchanges.	10
Association of Equipment for Siting Various Types of Racks.	10
Auto. Exchanges - Alternate Trunking of Transit Switches, Country.	10
Auto. Exchanges - Trunking Country.	10
Auto. Trunk Switching, and Manual Equip., Location of Exchange, Long Line.	3
Automatic Exchanges, Ceiling Heights for.	7
Automatic Exchange Equip. Current Requirements.	20
Automatic Exchanges, 2000 Type Equip. Schedule.	23
Automatic Routers.	22
Basic Considerations, Accommodation.	2
Battery Rooms, Location of.	3
Block Arrangements on T.C.F.'s.	19
Blocks for Access and Shelf Wiring, Head of Rack.	14
Block Schematic, Typical Cabling.	14
Bracket Method of Cabling, Clip and.	14
Branch Exchange Layouts, Typical.	10
Branch Exchange Layout, Typical Single Storey Building.	14
Branch Exchange - 2400 Line Layout, Single Storey.	10
Branch Exchange, Pre 2000 Type.	10
Branch Exchange - Wire Diagram.	14
Building for Country Exchange, Typical Two Storey.	4
Building, Prefabricated.	4
Building Requirements.	4
Building, Temporary Accommodation for 200/400 Branch Exchange, Equipment Layout for Standard.	4
Building, Temporary Accommodation for 1200 Line Branch Exchange, Equipment Layout for Standard.	4
Building, Three Story Exchange.	4
Building, Two Storey Exchange.	4
Building, Two Storey L Shaped.	4

	<u>Section</u>
Building, Typical Allocation for a Large City.	3
Building, Wider Type Mezzanine.	4
Building with other Equipment Groups, Single Storey Prefabricated.	4
Buildings Branch, Responsibilities of.	3
Buildings Country Areas.	4
Buildings, Country Dual Purpose.	3
Buildings, Extensions to.	3
Buildings, Functional Conditions, Metropolitan Exchange.	4
Buildings, Functional Design of.	3
Buildings, Length Table of.	6
Buildings, Length Table, Prefabricated.	6
Buildings, Lengths, Widths and Exchange.	6
Buildings Metropolitan Areas.	4
Buildings, Metropolitan Dual Purpose.	3
Buildings, Multi-Storey.	3
Buildings, Provision of Cable Holes in.	15
Buildings, Width Table of.	6
Buildings, Width Table, Prefabricated.	6
Buildings with Air Ducts, Types of.	13
Busbar, Max. Loads Etc., Aluminium.	20
Busbar, Max Loads Etc., Copper.	20
Cable Chutes.	14
Cable Design Methods.	14
Cables Economy, Equipment Grouping for.	10
Cable Entry Methods, from switchroom to manual suite.	10
Cable Hole Positions.	15
Cable Holes in Buildings, Provision of.	15
Cable Rooms Partition.	18
Cable Sections Down Racks and Frames, Typical.	14
Cable Sections, Typical.	14
Cable Size for 2000 Type Circuits, Number of Wires and.	14
Cable Sizes on M.D.F.	18
Cable Slots.	14
Cable Tracks, Running.	14
Cable Trough Assembly.	17
Cable Troughs.	17
Cable Trough for Test Desk and Manual Positions.	17
Cable Trough at Bottom of Rack.	17
Cable Troughs, 2000 Type Auto. Exchange. Miscellaneous.	17
Cable Troughs, Uses and Limitations.	17
Cable Well, Provision of.	18
Cable Wells, Air Ducts in.	13
Cabling, reference on specification.	23
Cabling Arrangements, Third Selector.	14
Cabling Block Schematic, Typical.	14
Cabling, Clip and Bracket Method of.	14
Cabling Design, Aids to.	14
Cabling, Developments to Aid Economic.	14
Cabling D.S.R. Traffic Recorder Access Racks.	14
Cabling, Details of Holes Provided for a Manual Exchange.	15
Cabling Features, Special Construction and.	18

Cabling Final Selector Routiner and Traffic Recorder Access Racks.	14
Cabling Fitting for Lane and Track.	14
Cabling Fourth Selector Routiner and Traffic Recorder Access Racks.	14
Cabling, Lane and Track Method of.	14
Cabling M.D.F. to Final Selectors Obviates Loops of Cable when Cabling from Final Selector to M.D.F., Direct Path Runway.	14
Cabling Methods, Comparison of.	14
Cabling, Miscellaneous, new method of providing.	14
Cabling, New Method of Providing Miscellaneous.	14
Cabling of Common Services Equipment Cabled Direct from A.E.R.	14
Cabling of Common Services Racks Cabled via Sub-Section Terminal Strips.	14
Cabling of Routers and Traffic Recorders.	14
Cabling Practices, New.	14
Cabling Practices to Reduce Terminating, Modified.	14
Cabling Schedule.	14
Cabling System, Standard.	14
Cabling Third Selector Routiner and Traffic Recorder Access Racks.	14
Calculations for Floor Slabs.	5
Calculations of Floor Loads.	5
Calculations Power Feeder.	20
C.B. and S.C. Manual Switchboards, Clearances and Groupings for.	10
C.B. and Sleeve Control Prefabricated Timber Type Building, Specially Designed for.	10
C.B. and Sleeve Control Trunk Exchange, Typical C.T.S. Panel.	10
C.B. and Sleeve Control Trunk Exchange Key to Face Layout Designations.	10
C.B. Manual and Sleeve Controlled Trunk Positions.	10
Ceiling Heights in other than Auto, and Manual Exchange Switchrooms.	7
Ceiling Heights for Auto. Exchanges.	7
Ceiling Heights for Internal Plant Buildings.	7
Ceiling Heights, Manual Exchange Switchrooms.	7
Ceiling Heights, Standard.	7
Central Battery Multiple and Sleeve Control Trunk Positions.	10
Centralised Power Supply.	20
Chart for Lane and Track Cabling, Cabling.	14
Charts, Appropriation.	19
Chutes, Cable.	14
Chutes, Floor Slots, Typical Arrangements of Various Classes of Cabling.	15
City Branch Exchanges, Rack Requirements.	10
City Exchanges, Main Additional Racks Per Branch, Rack Requirements.	10
City Exchanges Main and Branch Summary Rack Requirements.	10
City Exchange Main Excluding Branches, Rack Requirements.	10
Cleanliness, during installation.	23
Clearances and Groupings for C.B. and S.C Manual Switchboards.	10
Clerical, Records Etc.	23
Clip and Bracket Method of Cabling.	14
Column Located in any Row.	8
Columns and Rows of Equip. for 6' 6", 13' 0" or 19' 6" Spacing of Columns.	8
Columns at 19' 6" Centres, Grid Holes in Floors Approved Equip. and Wiring Aisles and Rack Positions, Relationship between.	8
Columns between two Groups of Equipment.	8
Columns in Main Passageways.	9
Columns in New Buildings, Locating.	8
Co-Main Exchange, 2000 Type.	10
Complaints and Interception Circuits.	21
Composite Access Racks.	22
Common Services Equipment Cabled Direct from A.E.R., Cabling of.	14
Common Services Racks Cabled Via Sub-Section Terminal Strips, Cabling of.	14
Conditions Generally Met in Positioning Overhead Tiebar Runway Racking.	13
Connection Frames, Cross.	19
Control Racks.	22
Control Test Racks.	22
Co-ordination with Associated Installation.	23

	<u>Section</u>
Copper Busbar, Max. Loads Etc.	20
Cordless Type Trunk Positions.	10
Country Areas Buildings	4
Country Auto. Exchanges - Alternate Trunking of Transit Switches.	10
Country Auto. Exchanges Excluding Branch Exchange, Rack Requirements.	10
Country Auto. Exchanges Standard "0" Level Codes.	10
Country Auto. Exchanges Summary, Rack Requirements.	10
Country Auto. Exchanges - Trunking.	10
Country Branch Exchange, Rack Requirements.	10
Country Centre, Mezzanine Type Building for Large.	4
Country Centres, Test Facilities.	21
Country Dual Purpose Building.	3
Country Exchange Building, Single Storey.	4
Country Exchange, Typical Two Storey Building for.	4
